

## Multiple System Atrophy (MSA) and Cognition

**Monday, November 12, 2018**

*3-4pm Pacific Time*

*Speaker:*

**Kathleen Poston, MD, MS**, movement disorders specialist,  
Stanford Movement Disorders Center

*Dr. Poston will address these topics:*

- What are considered normal cognitive problems in MSA?
  - Can "cognitive impairment" be part of MSA?
  - Can "dementia" be part of MSA?
- Are there symptoms that can mimic dementia?
- When should a diagnosis of "Lewy body dementia" be given?
- Does it make a difference? What's the treatment?

*Register in advance for this webinar:*

**<http://bit.ly/msawebnov18>**

*Host:*

Candy Welch, leader of Brain Support Network's MSA caregiver support group

There will be time for questions-and-answers with Dr. Poston and Ms. Welch.

Brain Support Network, the co-organizer, will be posting notes from Dr. Poston's presentation and the Q-and-A to its website within a few days of the webinar.
