HEALTHY BRAIN AGING STUDY

About one in nine age 65 or older has Alzheimer's.

**LET'S FIND A SOLUTION
TOGETHER**

The Healthy Brain Aging Study of the Stanford ADRC is looking for older adult volunteers for a longitudinal study on healthy brain aging, mild cognitive impairment, Alzheimer's disease, Parkinson's disease, and Lewy body disease.

If you or a loved one are experiencing memory concerns or have been diagnosed with any of these brain disorders, please consider volunteering for our study. Older adults without memory concerns may also be eligible to participate.

JOIN FOR FREE

Receive at no cost:

- If you have a MediCal card, you will receive **\$100 stipend** for each day of participation in our center (maximum 2)
- **Medical test;** neurologic exam, memory test, imaging of the brain (MRI)
