

Volunteers needed for Parkinson's Disease study

The Department of Neurology at Stanford, in collaboration with SRI, is looking for people with Parkinson's disease and healthy volunteers, between the ages of 50 and 80.

The goal of this research is to learn more about changes in cognition and motor function with aging.

Study participation includes:

- 2 days of testing at baseline, and again after 2 years.
- MRI brain scan
- Cognitive and motor exams
- Remote sleep assessment (via Oura ring)
- Participants will be compensated for their time

To register, or for additional information, please contact our recruitment team at hivpd23study@stanford.edu

The principal investigators for this study are Tilman Schulte, PhD and Kathleen L. Poston, MD

Participant information is kept strictly confidential, and participation is completely voluntary. For general information about participant rights, contact 1-866-680-2906
